## Profile

---

I'm a software developer with a desire to dive deep into how things work. My free time is spent programming and studying development. I began teaching myself web development during university and since then my passion has snowballed into an insatiable drive to explore mind-bending problems and build amazing products. Let's build them together!

## Experience

---

### Digital Campaign Coordinator (April 2015 – April 2016)

*Essential*

- Created a prototype of a Federal electorate segment generator with Meteor.js and the Campaign Monitor API for use across all clients
- Implemented the companies first use of video-background landing pages with jQuery for the Australian Marine Conservation Society
- Implemented jQuery ajax survey for Luke Batty Foundations, anti-domestic violence Father's day action

### Content and Community Management / Developer Intern (spring 2013)

*We Are Social*

- Created eDMs
- Brief training in iOS development

## Education

---

### Web Development Immersive ( May 2016 – July 2016 )

General Assembly

Full-stack web-development with Ruby on Rails and JavaScript

### JavaScript Study Group 10-week (2015) *ansarada*

One night a week JavaScript study group hosted by ansarada.

### Start-up boot camp (2015) *General Assembly*

2 day boot camp on start-up fundamentals.

### Digital Campaigning boot camp (2015) *Centre for Australian Progress*

4 day boot camp on digital marketing for politics.

### Bachelor of Arts – Media (2014)

Macquarie University

Media Theory, International Media Regulation, Culture and Technology.

## Technologies

---

### JavaScript

Node.js, ES5, ES6, jQuery, AJAX, Backbone, React, Meteor.js, Socket.io, Three.js, Browserify, Gulp, Babel

### Ruby

Sinatra, Rails, RSpec, ActiveRecord

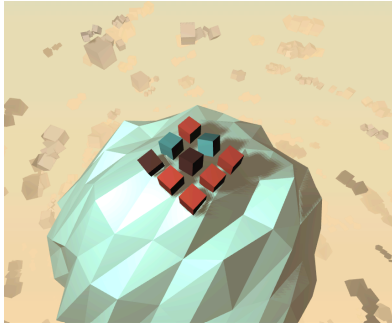

## Projects

---

### TIC TAC TOE 3D

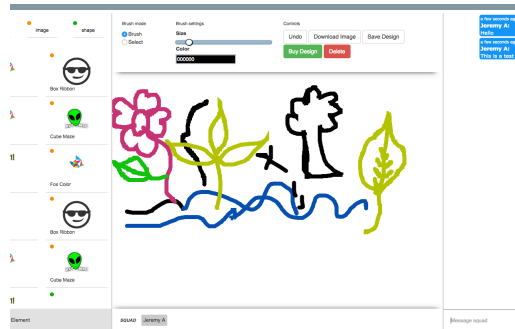

Three.js, Node.js, Websockets, React  
Gulp, Babel, Browserify

When on smaller-width devices it renders a DOM version of game to play.

### SQUADRAWN

Rails, Websockets, Backbone, jQuery, Paper.js,  
HTML5 Canvas, CSS3

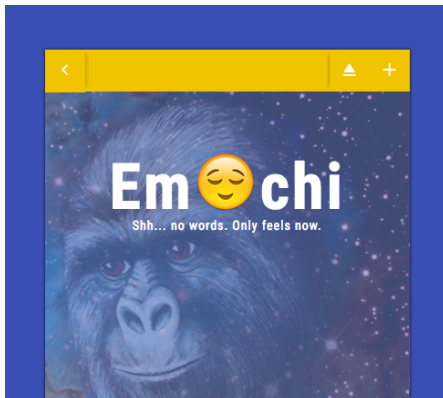

Create and design t-shirts with friends in real-time.

---

### Emochi

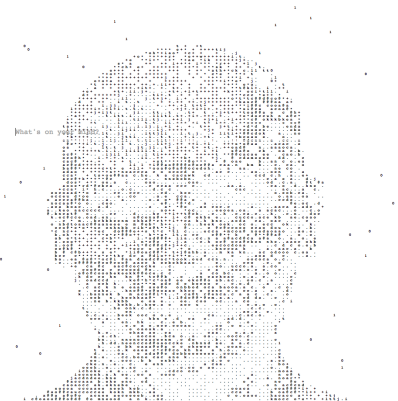

Node.js, React, Socket.io, API, CSS3  
Gulp, Babel, Browserify

A real-time chat application that only allows you to communicate with Emojis, using a very cool predictive text/emoji neural network API from Dango .

### Identity Construct

JavaScript, HTML5 Canvas

An art project made in university. I use HTML5 canvas as a reference to position elements on the page.
